Kako napraviti rupu od metka

Otvorite Photoshop, File -> New i postavite dimenzije na npr. 200 x 200. Obojite pozadinu bojom kojom želite. Napravite novi layer (Ctrl + Shift + N) i dajte mu ime Krug.

<u>N</u> ame	
<u>C</u> olor	
Mode	Normal V Opacity: 100 > %
	(No neutral color exists for Normal mode.)

Odaberite Elliptical Marquee Tool

I kada pravite selekciju držite Shift da diste napravili pravilan krug. Zatim ga ispunite crnom bojom.

Napravite novi Layer i imenujte ga kao Rub. Zatim ga premestite ispod Layera Krug

Odaberite Polygonal Lasso Tool.

Zatim označite Layer Rub i napravite ovakvu selkciju oko ruba.

Zatim odaberite Gradient Tool i podesite ga ovako:

Zatim povucite od vrha selekcije nadole tako da izgleda kao ovo.

Zatim pritisnite Ctrl+D da odselektujete selekciju.

Kliknite na Layer Rub i idite na Filter-> Stylize-> Emboss i podesite vrednosti kao na slici.

Zatim kliknite na Filter - > Stylize -> Diffuse kliknite na Darken only i kliknite na OK.

Kliknite na Layer Krug i idite na Filter -> Pixelate -> Fragment. Zatim idite na Filter -> Brush Strokes -> Sprayed Strokes i podesite kao na slici.

Strokes Crosshatch Sprayed Strokes Stroke Length Stroke Length Spray Radius Stroke Direction: Right Diagonal	Cancel	
d Strokes Crosshatch Stroke Length Spray Radius 7 Outlines Spatter Stroke Direction: Right Diagonal	Sprayed Strokes	~
Outlines Spray Radius 7 Stroke Direction: Right Diagonal	Stroke Length	3
Outlines Spray Radius 7 Spatter Stroke Direction: Right Diagonal		
Stroke Direction: Right Diagonal	Spray <u>R</u> adius	7
Stroke Direction: Right Diagonal		
	Stroke Direction: Right Dia	agonal 💌
24		Cancel Sprayed Strokes Stroke Length Spray Radius Stroke Direction: Right Dia

Sada idite na Filter -> Blur -> Motion Blur i unesite ove vrednosti:

Angle: -43 Distance: 3 Pixels

Evo konačnog rezultata:
